

## Energy (Jingle Bells)

Energy is found...in many different forms

Solar, wind and coal make our electric power

Natural gas is burned to keep our houses warm

Petroleum is used to make our cars and trucks go vroom!

Oh...energy, energy, it's what heats our homes

It powers our lights and fuels our cars

It makes the world go round....

Oh...energy, energy, it's what heats our homes

It powers our lights and fuels our cars

It makes the world go round.
